How Do I Auto-Download Contact Pictures?

Last Modified on 11/02/2020 1:21 pm CST

Auto-Download Contact Pictures

Users can now set their accounts to auto-download Social Connector photos. Turn on this option by clicking the Customize This Screen on the bottom of a Contact Card.

Once this option is on, when a social connector match is found, the photo is added to the contact photo. You can still use your own photos, or choose a different Social Connector photo.
