

# Dec 10, 2020 - Special Events, Marketing Icon, & Send Email in Mobile Version

Last Modified on 12/10/2020 3:51 pm CST

We've made a few small changes to our HyperDrive CRM Pro to help make your life a little easier!

## Special Events Tab Update

We've slightly updated the look of the Special Events Tab. The "Name for the Address Label" is also no longer a required field.

Occasion  🎂 Birthday  ❤️ Anniversary  📅 Other

Description

Date Month Day Year (Optional)

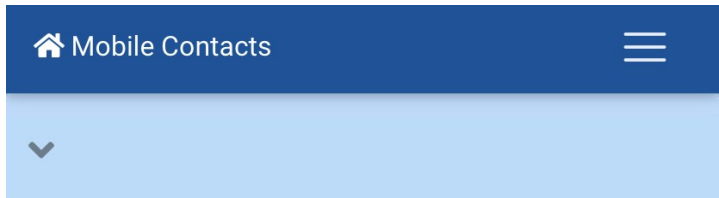

Name for Address Label  *Used for address labels in the **Birthday & Anniversary Report***

## Contact List - Marketing Icon

When on the Contact List, we've modified how the Marketing icon works. There is no longer a separate page load when you change someone in or out of Marketing. This speeds up the process and makes this more usable with the longer lists.

## Mobile Version - Send an Email

You can now send a simple, text-only email out of the system using the mobile version. It will be captured in the notes and show the analytics, etc., the way an email sent on the desktop would.

**test test**

No phone numbers on file
